

Please leave the NO CALL LIST laws in tact as is in wisconsin. It has been a huge benefit to my family since it was put in place.

My husband works out of our home and cannot turn off our home phone due to business reasons. Before this law went into effect, our answering machine recorded up to 10 calls/day that interrupted his activity, not to mention the time to screen the messages each day.

These calls also accelerated in the evening hours and led to our getting Caller ID to filter out these calls as they make the majority of the calls we receive each day.

Please do not allow any further calls from these marketing agencies. Thank you.
